

VINCENT BAGILET

@ vincent.bagilet@ens-lyon.fr

🔗 vincentbagilet.github.io

📍 Lyon, FR

Current Position

Postdoctoral Fellow in Economics

2024-Present

Ecole Normale Supérieure Lyon (ENS Lyon, CERGIC)

Education

PhD in Sustainable Development

May 20, 2024

Columbia University

Adviser: Jeffrey Shrader

Committee members: Suresh Naidu, Andrew Gelman, Jeannette Stingone, John Mutter

Master in Quantitative Economics (PPD)

2018

Paris School of Economics (PSE)

Master in Environmental Economics

2017

AgroParisTech - Paris-Saclay University

Master in Engineering, specialization in Energy

2017

Ecole Centrale Lyon, last year at Ecole Centrale Paris

Research Fields

Environmental Economics, Political Economy

Working Papers

Causal Exaggeration: Unconfounded but Inflated Causal Estimates [[Project website](#) 🔗, [Download](#) 📄]

Abstract: The credibility revolution has made causal inference methods ubiquitous in economics, yet it coexists with selection on significance. I show that these two phenomena interact in ways that reduce the reliability of published estimates: while causal identification strategies alleviate bias from confounders, they reduce statistical power and can generate another type of bias—exaggeration—when combined with selection on significance. I characterize this confounding-exaggeration trade-off theoretically and via realistic Monte Carlo simulations, and document its prevalence in the literature. I then propose practical solutions, including a tool to identify the variation actually driving identification.

Accurate Estimation of Small Effects: Air Pollution and Health [[Project website](#) 🔗, [Download](#) 📄]

Abstract: This paper identifies tangible design parameters that might lead to inaccurate estimates of relatively small effects, the short-term health effects of air pollution. Low statistical power not only makes relatively small effect difficult to detect but resulting published estimates also exaggerate true effect sizes. We first document the existence of this issue in the epidemiology and economics literature of interest. Then, we identify its drivers using real data simulations that replicate most prevailing inference methods. Finally, we argue relevance to many other literatures and propose a principled workflow to evaluate and avoid exaggeration when conducting a non-experimental study.

Design Beyond Identification, joint with Andrew Gelman, Claire Palandri, and Yuling Yao

Abstract: Causal inference studies generally have multiple goals, aiming not only to estimate “the” average treatment effect but also analyze how it varies across individuals and time, how it impacts multiple outcomes, or how these effects can be extrapolated to other populations. Through a set of examples from multiple literatures in the social sciences, this paper shows how expecting

to produce these multiple estimates and the importance of external validity can orient choices at the design stage, to ensure the study—be it a survey, or an experimental or quasi-experimental setting—is set up for success. We advocate making substantively- motivated assumptions about effect sizes and variation in light of the goals of a study, anticipating and allowing for both uncertainty and heterogeneity in effect sizes. We outline a workflow and provide code to implement design calculations and simulations.

Work in progress

The Environment in French TV News, *joint with Elisa Mougin*

Peer Effects in Voter Turnout, *joint with Jade Ponsard*

Peer Effects in Pro-Environmental Behaviours, *joint with Marion Leroutier, Théo Konc*

Burden and Acceptability of the French Carbon and Gasoline Taxes

Research Experience

Visiting PhD student May – July 2023
Sciences Po, Economics Department, with *Emeric Henry*

Visiting PhD student June – August 2022
Toulouse School of Economics (TSE), with *Sylvain Chabé-Ferret*

Visiting PhD student June – July 2019
University of Oxford, INET, with *Linus Mattauch*

Research Intern in Environmental Economics April – Sept 2017
CIRED

Research Intern in Geopolitics of Resources April – June 2016
ENS Lyon, Michel Serres Institute

Research Intern in Development Economics January - April 2016
GATE Lyon

Research Intern in Political Economy May - Aug 2015
South African Institute of International Affairs

Teaching Experience

Current Teaching at ENS Lyon

Econometrics 1 (Grad, half course)	Fall 2024
Topics in Econometrics (Grad, half course)	Fall 2024
Machine Learning and Data Analysis (Grad, Text Analysis section)	Fall 2024
Empirical Environmental Economics (Undergrad, half course)	Spring 2025

Teaching Assistant at Columbia University

Environmental Science for Sustainable Development (PhD)	Fall 2021, 2022, 2023
Microeconomics and Policy Analysis II (Grad)	Spring 2022
Challenges of Sustainable Development (Undergrad)	Spring 2021
Macroeconometrics (Grad)	Spring 2020
Microeconomics and Policy Analysis I (Grad)	Fall 2019, 2020
Tutor: Microeconometrics, Macroeconometrics (Grad)	Fall 2019, Spring 2022

Fellowships and Grants

SIPA Dean's Fellowship, Columbia University

2018-2024

Academic presentations

2023: *TSE Environmental Economics Workshop*

2022: *EuHEA Conference**, *TSE Environmental Economics Workshop*

2021: *Interdisciplinary Ph.D. Workshop in Sustainable Development, FAERE annual conference**

* = co-author

Service

Referee: *Economics of Transition and Institutional Change*

Core-organizer: *Interdisciplinary PhD Workshop on Sustainable Development (2021)*

Co-organizer: *Alliance Summer School in Sustainable Development (2019)*

Other information

Languages: French (*native*), English (*fluent*), Spanish (*conversational*)

Software skills: R , $\text{\LaTeX}$, Git , Matlab , Stata

Citizenship: French
