

VINCENT BAGILET

@ vincent.bagilet@ens-lyon.fr

🔗 vincentbagilet.github.io

📍 Lyon, FR

Current Position

Postdoctoral Fellow in Economics

2024 - Present

Ecole Normale Supérieure Lyon (ENS Lyon, CERGIC)

Education

PhD in Sustainable Development

2024

Columbia University

Master in Quantitative Economics (PPD)

2018

Paris School of Economics (PSE)

Master in Environmental Economics

2017

AgroParisTech - Paris-Saclay University

Master in Engineering, specialization in Energy

2017

Ecole Centrale Lyon, last year at Ecole Centrale Paris

Research Fields

Environmental Economics, Political Economy

Working Papers

Causal Exaggeration: Unconfounded but Inflated Causal Estimates [[Project website](#) 🔗, [Download](#) 📄]

Abstract: This paper shows that the feature that makes causal identification strategies credible, discarding variation to isolate exogenous sources, can also reduce the reliability of resulting estimates. By discarding variation, causal strategies reduce statistical power, leading statistically significant estimates to exaggerate true effects. Through theory and calibrated simulations, I formalize this confounding-exaggeration trade-off and show that the exaggeration bias can exceed the confounding bias the causal strategy does eliminate. I then introduce a ready-to-use diagnostic tool to identify the identifying variation in an applied study: the observations actually driving the causal estimate.

Accurate Estimation of Small Effects: Illustration Through Air Pollution and Health

[[Project website](#) 🔗, [Download](#) 📄]

Abstract: This paper identifies design parameters that can lead to inaccurate estimates of small effects. Low statistical power not only makes such effects difficult to detect but resulting significant estimates also necessarily exaggerate true effect sizes on average. Through the literature on short-term health effects of air pollution, I explore this issue and its policy implications. Exaggeration can be substantial and power low even with large sample sizes. Real-data simulations highlight key additional drivers: the number of exogenous shocks, instrument strength, and outcome count. I propose a workflow to evaluate and mitigate exaggeration risk in non-experimental studies.

Work in progress

Climate Change Narratives: Environmental News in French Newscasts, *joint with Elisa Mougín*

Geopolitical Shocks and Environmental Discourse in Agriculture, *joint with Mathieu Couttenier, Sophie Hatte, and Elisa Mougín*

Research Experience

Visiting PhD student Sciences Po, Economics Department, with <i>Emeric Henry</i>	May – July 2023
Visiting PhD student Toulouse School of Economics (TSE), with <i>Sylvain Chabé-Ferret</i>	June – August 2022
Visiting PhD student University of Oxford, INET, with <i>Linus Mattauch</i>	June – July 2019
Research Intern in Environmental Economics CIRED	April – Sept 2017
Research Intern in Geopolitics of Resources ENS Lyon, Michel Serres Institute	April – June 2016
Research Intern in Development Economics GATE Lyon	January - April 2016
Research Intern in Political Economy South African Institute of International Affairs	May - Aug 2015

Teaching Experience

Current Teaching at ENS Lyon

Topics in Econometrics (Grad) ↗	Fall 2024, 2025
Text As Data in Economics (Grad, course section) ↗	Fall 2024, 2025
Introduction to Empirical Environmental Economics (Undergrad, half course) ↗	Spring 2025, 2026
Data Visualization for Economics Research (Lyon Summer School in Empirical Research Methods) ↗	2025, 2026

Past Teaching at ENS Lyon

Econometrics 1 (Grad, half course) ↗	Fall 2024
--	-----------

Teaching Assistant at Columbia University

Environmental Science for Sustainable Development (PhD)	Fall 2021, 2022, 2023
Microeconomics and Policy Analysis II (Grad)	Spring 2022
Challenges of Sustainable Development (Undergrad)	Spring 2021
Macroeconometrics (Grad)	Spring 2020
Microeconomics and Policy Analysis I (Grad)	Fall 2019, 2020
Tutor: Microeconometrics, Macroeconometrics (Grad)	Fall 2019, Spring 2022

Fellowships and Grants

SIPA Dean's Fellowship, Columbia University	2018-2024
---	-----------

Academic presentations

2025: GATE on the Docs, EM Lyon - QUANT seminar, FAERE annual conference

2024: ENS de Lyon, Institut des Politiques Publiques

2023: TSE Environmental Economics Workshop

2022: *EuHEA Conference**, *TSE Environmental Economics Workshop*

2021: *Interdisciplinary Ph.D. Workshop in Sustainable Development*, *FAERE annual conference**

* = co-author

Service

Scientific Event Organization

CERGIC External seminars (co-organizer)	2024 - Present
Lyon Replication Games (local organizer)	2025
Interdisciplinary PhD Workshop on Sustainable Development (main organizer)	2021
Alliance Summer School in Sustainable Development (co-organizer)	2019

Referee

Economics of Transition and Institutional Change

Master Thesis Supervision

Clarisse Benoit Tondou, Arthur Dornat (co-supervision), Alexandra Ecuyer	2025-2026
Mateo Bortoli, Youenn Mandon (co-supervision)	2024-2025

Development of coding packages (in R)

ididvar: provides tools to identify the identifying variation in a regression [↗](#)

rallicagram: a wrapper to make simple and quick analyses of various text corpora [↗](#)

mediocrethemes: ready to use ggplot themes [↗](#)

Other information

Languages: French (*native*), English (*fluent*), Spanish (*conversational*)

Software skills: R , LaTeX , Python , Stata , Git , Matlab

Citizenship: French
